Brief description of our group project

Our group's goal is to create a pop art book using the flags of countries related to our group. We first chose Canada(studying now) and then we decided to show images of each group member's country (South Korea, China) and Japan, the most famous Asian country. The pop-art book we created works by showing users the most iconic models of the country.

our role

Our group members set a meeting time and participated, shared each other's feedback and ideas, and finally decided to provide pop art books for each country, and each shared their roles. Below is a description of the main roles they each played.

Yizhi Zhou : Responsible for creating markers and working on "AR.html".

Hyewon Kim : Responsible for "group page.html" and "page.css".

Jingtian Zhu : Responsible for creating "QR codes", and finding "obj models".

Hoyoung Kim : No participation in group meetings and work since phase_1, no contact.
